## Projects

### Nexura Build

Live Github Server

**Technologies:** React, Tailwind CSS, Express, MongoDB, Stripe, Firebase

A Building Management Website, where a user can see the flats information of the building and request rent. If the admin approves his request the user will be registered as a member and get the flat as rent. By using the website all members can pay the monthly rent of their apartment.

- **Request For Rent:** Users can request to rent apartments they like.
- **Monthly Rent:** Members can send monthly rents through Stripe.

### Blood Bondhu

Live Github Server

**Technologies:** React, Tailwind CSS, Express, MongoDB, Firebase

A blood donation website where people can register as donors and users can post for seeking blood in an emergency.

- **Location Mapping:** A simplified mapping technique was added to connect close areas so that it will be easy for the donor to see which request is near to him/her.
- **Personal Messaging:** Personal Messaging: A donor and user can do personal messaging through this website.

### Prismcraft Emporium

Live Github Server

**Technologies:** React, Tailwind CSS, Express, MongoDB, Firebase

An arts and crafts selling website. Users can post and see the owner's contacts of the product through this website.
